DETAILED ACTION

1. This communication is in response to Applicant's amendment filed on June 30, 2004. The rejections cited are as stated below:

Response to Applicant's amendment

2. Applicants' amendment filed on June 30, 2004 have been fully considered, and discussed in the next section below or within the following rejections are not deemed to be persuasive. Applicants' request for allowance is respectfully denied.

The Examiner acknowledges Applicant's amendment to claims 8 and 14, and therefore withdraws the previous office action rejections under 35 U.S.C. 112 2nd and 35 U.S.C. 101.

Claim Rejections – 35 U.S.C. 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. The factual inquiries set forth in *Graham v. John Deere Co.*, 148 USPQ 459, that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

Art Unit: 3624

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or unobviousness.

5. Claims 14-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over the MathWorks, Inc. "GARCH Toolbox: For Use With MATLAB", July 1999, (hereinafter "Garch") as discussed in a previous office action mailed on 2/24/03. Furthermore:

Claim 14, the phrase "capable of" is not a positive limitation, claim limitations that employ phrases such as "adapted to" or "capable of" may not distinguish over prior art. It has been held that the recitation that an element is "adapted to" or "capable of" performing a function is not a positive limitation but only requires the ability to so perform. Therefore, claims 14-16 are rejected over Garch in light of this claim interpretation.

Response to Arguments

6. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.
